"And the service of the contract of t "SISSY SLOW"

I really believe some people are so a low they could not catch a cold. If they ever get one, they really do not get II—It gets them. If they ever get one, they really do not get II—It gets them. If they ever get one, they really do not get II—It gets them. If they are like moissases in white the cold is they do not think it is very important. If the law is the same than the very important is a "steady" and the prover was new-less than the same to be shown are not clever and brilliant you can are not clever and somebody who are had bright brains and great gifts, but they do not use them, and somebody who have had been the same and the same to be slow. The provided ones, the same to be slow. The provided one should be successfully made to the provided ones, the same to be slow and

Lift Off-No Pain!

Doesn't hurt one bit! Drop a little 'Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with

shortly you lift it right off with fingers. Your druggist sells a tiny bottle of 'Freekone' for a few cents, sufficient to remove overy hard corn, soft corn or corn between the lose, and the foot callouses, without soreness or irrita-tion.

To Revive Trade

Purchasing Power of Farmers Must Be Restored at Once
That there can be no great industrial revival until the farmers' purchasing power is restored by a protein his wife name. Stanford ville, onl., of the Canadian Breeders' Association, in his address at the annual, meeting of the association, in the Canadian Breeders' Association, in his view and the stated, may hrovive a lowering of transportation costs and lowering of prices of all goods that ordinarily find a market on the Gara. I feet long, and has 222 arches.

Learning From the Past

Learning From the Past

Delving Into Tomb of Pharoah May
Teach Us Something
The exeavators at Luxor report that
the mummy case of Tutenkhamen is
something to make moderns marvel.
Whatever scientific objects may be
people will take the trouble to dig latot
the tomb of the ancient monarch, one
very obvious and very valuable lesson to be gleaned is that the present
can learn a good deal from the past if
people will take th trouble to dig latot
the records and unearth the veldence
of bigone achievements. Wisdom
diff not dawn with the birth of the now
living generation, nor when our Ukting ancestors began to give up their
roving life and settle down in the
woods of Britain. Successive civiltrations had grown heary in turn long
before the present one bigan to devion. That fact la-heing impressedupon the minds of millions of newspaper readers the world over by the
despatches which have come from the
Valley of the Kings in the last couple
of year? Perhaps one result will be
to revive the study of history. If
King Tut does that for us we shall
to be a large dobt to him and to those
who took such pains to eptomb blim
In a manner befitting a Pharoah.—

WE NEED EDUCATION

ic educat onist, at one time on the staff of St. Francis Xaviour, in the course of a recent address said:

The world has advanced enormously in educational matters. Every state Nova Scotia is falling behind on acthe eastern provinces in this respect. We have the natural resources—mininces have splendid natural resources.

We have the character of the people paid to members through waived paytor reckon with. There is another factor, too—ciucation—training of the waived payments for 1924, these minds of the people. *Tat's these:

Sections of the Repartment have to reckon with. There is another fac-tor, too-education—training of the initials of the people. The there three factors—anatural resources, and they so fo make for prosperity. The first two are constant, the re-sources are here and the people, are here, but the factor of education is new-ship. Indiana, and the society operates

PROVINCIAL RED CROSS

cial Division of the Red Cross Society was held at Government Buildings on Friday, the 15th, with his Hon. Lieut. Governor Grett in the chair. There was a large attendance of Red Cros members, delegates from rural dis tricts and the general public.

The reports of the executive showed remarkable progress during the past year in spite of the great handicar of limited finance.

Some of the main points emphasized were the development of the work of the Junior Red Cross, and the maintenance of the Children's Hospital at Calgary and the health service for children. The provision of Rural Nursing Service, especially in isolated districts; the training of worce in the knowledge of home-nu sing and la gienc; the maintenance of emer gency and disaster-relief stations to emies, etc. ents, epide

"The whole development torns on tie question of finance," said the re of holding membership drives, the de cision arrived at was that this was was finally agreed that a better nd more successful method wou c be ate one day in the year to fixed to be October 31st, and to be kept a rermanent one, when in every district, two and city an appeal would be n ade for the Red Cross. To mity will be alloted in whatever way they choose. Collect-ing boses will also be placed in the homes of the people and on Red Cross or Health Day these would be opened. In connection with the proposed new departure of nursing classes four points had been decided on for the ex-periment of these Health Instruction Classes: Wayne, Bowden, Three Hill and Lowond. The appoint next of a public health nurse will be main immediately in this connection.

Total membership 28,317.

A RAILROADER'S LAMENT

We walk the track in the fall, We walk it in the spring when the

ducks are a-wing, In the winter time, too, darn it all

We walk it when cold rains are pour ing, We walk it through sleet and snow

We don't give a darn how the wind "she lam,"

But over that track we go.

We walk when the sun sure is shin

ing,
We walk in the light of the m And we walk that old track when the night's so darn black We can't see to whistle a tune.

We find a darned rock on the track We heave like 'ell and curse as well Till we get a big crick in the back

Then we cock an ear in the darks You heave again, (gol darn the rain!)
And that rock in the lake it goes.

We don't care a hoot for trees falling We tackle them, great or small.

Though the slides they are work
where the curves are reverse,

We keep the track clear of them all

VALUE

From 1904 until 1923 the Ford Motor Company of Canada, Limited, manufactured 450,000 Ford cars and trucks of which 91% are still in use. More

convincing proof of their inbult worth could hardly be given.

Selected materials, simple design, and accurate workmanship are factors in this long like. They explain the high nithity and operating economy of the Ford when new. And, they also give, it the ruggedness to withstand the wear and tear of daily driving year after year.

This long lite means slow deprecia-tion, sustained value, satisfactory-performance from your Ford while you continue to drive it, and a meas-urable resale value when you wish to dispose of it:

It means that the Ford gives you unusual value per dollar invested, not only this year but for a long term of years to follow—means that when you select the Ford you obtain approved security for the dollars you invest.

Wheat And Cattle Trade Of West

The future of Western Canada—and that means the future of all Canada—depends upon what the future holds for the success of farming. The success of farming depends upon remedying conditions which today operate to leave no inargin of profit between coats of production and prices obtainable in world markets. The truth of these statements must be recognized by sury-body who gives the subject even a superficial study,

It may be open to question whether, for some years to come until world conditions become more settled, any materially higher price for our large exportable surplus of grain and cattle will be obtainable. But the desired results, namely, a larger equiture for the producer, can unquestionably be sectived through a reduction in costs of production and "marketing." Following the defeat of the Reciprocity Agreement with the United States

ed through a reduction in costs of production and marketing.
Following the defeat of the Reciprocity Agreement with the United States which provided for the free entry of Canaddan wheat and cattle into that country, the United States enacted, a new and higher tariff which amounts almost to a practical prohibition of export to the south. During the war, however, Europe took everything Canada could produce and at high prices. But the war also enormously increased anything the farmer had to buy and boosted freight rates to unheard of levels, thus ratising all costs of production and marketing.

While prices of grain and cattle have declined to prewar levels, costs of labor and articles entering into the work of agricultural production, and costs of marketing, have not declined in anything like the same ratio, and with his products practically excluded from the United States, the Western farmer and livestock producer finds himself dependent upon the war-improverlands, tax-burdened, currency-depreciated countries of Europe. It is little wonder that the industry of Larinnig is in-the doldrums.

Efforts have been made to improve the situation. For many years the Dritish Government maintained an embarge on Canadian cattle, but so long as our cattle colid be sent to the United States this did not so much matter, resulted in the British embargo being removed. What happened? The rate on cattle from Montreat to Liverpool which was \$15 a head was jumped to \$25 a head, thus robbing the Western livestock producer of much of the benefit he stores of sain through entry into the British market.

L'Inder the stress of war conditions railway freight rates had been made to the lates the Grow's Nest Pass agreement was suspended. In 1922 that suspension was ended and the lower rates on grain from the partities to the head of the lakes again game into effect. But at once lake freight rates were advanced to such an extent as to largely offset the reduction in mil rates, thus leaving the farmer in a position of "as you were."

These are Following the defeat of the Reciprocity Agreement with the United State

were."

These are but two examples of conditions which are operating to retard Western progress and development. The fact that farming and livestock production are not profitable enterprises in Western Canada at the present time is not the fault of the country or of the producers. That the country itself is all right is demonstrated by a 450,000,000-bushet wheat crop last year, and by the fact that livestock-is today a drug on the marget. The farmers and by reeders have done their part, and the country-can, and does, produce. It is man-made laws, systems and corporations that are at fault. They can, and must, be remedied, the obstacles removed, freedom in trade established, the shabeles struck off and the harmeles removed from transport and comshabkles struck off and the barnacles removed from transport and com-

the shables struck off and the barnacles removed from transport and cominerce.

It is now in session. The Dominion Parilament can right these abuses. It is now in session. Canada owns and operates more than one-half the rallway mileage in the Dominion. Canada owns and operates an ocean merchant marine of scores of vessels. Furthermore, as Sit Offford Silton politiced out in his recent address at Winnipeg, the harbors of the world are filled with ships that have nothing to do and that can be rented, hired, chartered, without the slightest trouble.

The provailing hold-up of the Western producer can be stopped at once if Parliament will but make up its mind to obt. Parliament can also, without doing injury to any other class or industry, telseen the cost of the implementation of the production. These simple cosmonic reforms would quickly revolutionize the Western situation, and with returning prosertly here the wheels of industry throughout Eastern Canada would also begin to revolve and give employment as in pist years.

The resulting activity and prosperity, oncouraging all-round development of natural resources, would be the best of all possible immigration policies. The present policies have been tried long enough and have failed. Give the new policy a trial by removing present hampering restrictions.

NEW BOX

A Health Secret It is frequently claimed by physicians that nine-tenths of all human ills may be traced to neglect to keep the bowels regular and the liver and kidneys active. The result is an accumulation of poisons in the system which cause pains and aches and give rise to such dreaded diseases as appendicitis, Bright's disease, diabetes, high blood pressure, etc.

Dr. Chase's Kidney-Liver Pills are the ideal regulators of these vital organs because they act directly on the liver, kidneys and bowls, and ensure a thorough cleansing of the system.

Twin Dangers

Invelled Disregard for the Lav Shown by Certain Classes of Citizens Society on this continent, as repre-ented by the forces of law and order

Society on this continent, as represented by the forces of law and order, is today confronted with two dangerous and hostile elements. The first is the congunuist campaign in fayor of mob violence, or direct action, as it has been cuphensifically terrated in Great Britain, involving the unbeyension of the existing form of government and the substitution for it of the rule of a violent minority. The second is a more finishous will into the think the inhedrocuments in one on apparent, and it has its origin within the hody politic of democracy, theft. It is the unveiled disregard of the law vinced by meny whose first care it should be to uphold respect tor it.—Financial Post.

Photographing Snowlakes
A Vermont man has the unusual hobby of photographing snowlakes. In forty Years he has not found any two that were exactly alike. Many of the forms are exceedingly beautiful. Lace makers, jewelers, designers of wallpaper, metal workers, wood carrors and others have purchased the photographs for use in making designs. The photographer catches snowfakes on a blackboard and photographs them with a camera that greatgraphs them with a camera that great magnifies them.-Youth's

The Meaning of Success

Not Necessary to Acquire Wealth in Order to be Successful

Order to be Successful
Success, like everything else in this
life, is a state of mind. I mean by
this that one person may possess
worldly goods in abundance and still
be poor in spirit, while another person be poor in spirit, while another person might have no majorial wealth to speak of, yet be rich in those qualities, of the mind which mean the sub-stance of wealth in reality. If all of us could bring ourselves to know this truth we could all be happier. Success in life does not necessarily wear the exceptions.

in the acquisition of money. Su

mean the acquisition of money. Success may mean a number of different people. To some jt-means contentuent to some, the accomplishment of a certain definite purpose In life; to cortain definite purpose In life; to chers, money.

Manny is not to be despised. There is a verse in the Bible which 'reads: "Money answereth all things." In a way, it does; but only in a way, one abould never contuse business success with success in life. Most of all, success means achievement. We may reach our goal, or we may not. The real success lies in trying.

solf.

"Since-the project, therefore, is entirely a self-financing and self-suignporting one, the unified votice of the under
west should be heaff for its commencement immediately, and its completion at the carliest possible date
otherwise, we should not continue to
complain about high transportation
costs for our exportable products."

The execulty director of the west
orn association went on is as what he

The executive director of the western association went on to say-that he
considers the Deep Waterway Improvement as the greatest economic
project before the people of the Dominton of Canada today. The June
mediate sayring and pofeitial benedits
were incalculable. Not only would
there be a sawling of from is 10 it cents
per bushed, on the farmer's grain,
through the tramp steamers of the
world being given a free seaway to
the beat of the linkes, but there would
be a corresponding saving, on other
exportable products, such as cattle,
dairy products, setc.
But that was not all. Very advartageous savings would also be effecteming commodities from Eastern
Canada and foreign countries.

Canada and foreign countries.

coming commodities from Eastern Canada and foreign countries.
"It is a well known fact," continued Mr. Bennott, 'that ocean tramps regulate traffic charges on the high seas, and when an ocean water route is established through from the Atlantie to the head of the lakes, it would at once and for all time do away with lake slipping at the present time, and with regard to which a universal protest-rends the beavene every summer and fall. At a very conservative estimate, there would be a direct saving of at least \$50,000,000 per year to the producers of Western Canada alone from the deepening of the canala to brigg tidewater' to the borders of our western wheat fields."

Drink Less Liquor

Statistics Show That the British Are Consuming Less Intoxica

Consumers of alcoholic liquors in Consumers of alcoholle fluorers in Britain have either not been so thirsty during the past two decades or have to the consumption of beer, spirits and wine in the United Kingdom has undergone an immense reduction since the end of the last century, according to the Alliance Year Book, the temperance reform handbook just fissued.

Beer consumed in 1898 per head was 255 scalings, in 1992 1556 scalings, in 1992 1556 scalings, in 1992 1556 scalings, in 1992 1556 scalings.

Beir consumed in 1889 per head was 2253 gallons, in 1922, 156 gallons, aprita in 1899, 1.09 gallons; in 1922, 0.36 gallons; wine in 1899, 0.41 gallons; in 1920, 0.26 gallons.

A contrast is made between the amount of beer consumed in 1922 and 30 years ago. Then a population of 229,000,000 in Engiand and Weles accounted for 27,500,000 barrels. In 29,000,000 in England and Wales accounted for 27,500,000 barrels. In 1922 the amount was 21,000,000 barrels, though the population has increased to 28,000,000.

WHEAT POOL IS DISCUSSED FROM

Saskatoon—The rival advantages of marketing through a proposed cooperative pool were presented to an overflow meeting here by Dr. Robert Magill and Anton Sapiro. Both Magill and Land Magill and Market Magill. "She has two millions unemployed. Her factopies are plosed because Europe in too torn and distrained to buy her goods. A large percentage of her merchant marine is rotting in the habbors. Picture a people that have lost heartly a million of the best men, who have devoted the savings of central matter as a people that have lost heartly a million of the best men, who have devoted the savings of central matter as a people that have lost heartly a million of the best men, who have devoted the savings of central matter as a few properties of the property of the can, were deliar horrowed from the United States."

In cleafing his speech, Dr. Magill admitted the reforms condition of the serious condition of the million of the reforms condition of the million of the serious condition of the million o

un United States."
In cleaning his speech, Dr. Magilli
admitted, the serious condition of the
house grower on the western prairies,
made that there were different
and that there were different
and that there were different
and the state of the serious controls offered. One was that the
farmer should look for other sources
of serious. Another was that by a
different form of unriveiting, and eliminating all the agencies that iles between the farmer and the middleman,
the state the seasons for the serious consists of the serious references.

minating all the secucles that lie between the farmer and the middleman, it might be possible to increase prices. "No speeches for or agridant the pool will decide the issue," said Dr. Magill. "It must be decided by a teat. If a new and better method can be developed, then in Haware's name let it be tried out, and the nooner we get it be better. You should be very sure and certain, however, that before you destroy the present machinery you have found a better way."

Mr. Saphy deciared that the Winnipes Grain, Exchange faid failed. It was today the most completions on the continent. The evoked loud cheers about the way of the present method to you this evening."

The farmer is the only manufacturer in the world who thinks all the time of producing and never of the marketing end of his business, he said. Colleges had taught bilm all about producing two blades of grass where only one grew before, but they shadut told bim how to get as much for the tree in the only men grew before, but they shadut told bim how to get as much for the two is the use fore, the two shed to the teacher.

grew before, but they haun to the two to get as much for the two he used to get for one before. He was to makill's inference one grew occure, out they make to me he used to get for one before. He was a mean for the two as he used to get for one before. He means the mean fresh effects of the mean fresh effects of the mean fresh effects out wheat, for if they evold afford to buy. United States cotton at present high prices they could any more for wheat.

Mr. Sapiro visioned a great world—both where the whicat surplus from Canada, the United States, Australia, New Zealand and the Argentine would be sold by a growers' committee on the Livespool market.

"Organizing the hale of world wheat it the biggerst thing in the world," he

"organizing the sale of world wheat is the biggest thing in the world," he sald, "but it cannot be done unless Canada takes the first step, and the wheat pool cannot succeed unless the Saskatchewan pool goes across."

Many Divorce Cases

Many Divorce Cases
Ottaws, Ont—The coming nession
will probably exceed all records of
parliamentary divorce. So far folice
has been given of 13º applications of
which 10 are from Quebec, 126 from
Ontario, and one from British Columbla. Of the Outario cases the great
number are from Toronto. In all
the provinces, save Ontario and Quebec, divorce courts are, in operation
and the parliamentary process is not
necessary.

Average feature to Farmers Higher Education.—That the average cash return per farm, in Alberta in 1922 was actually 318 higher than the average for the years 1918, 1919 and 1920 when grain prices were at their peak, was the striking attement of John M. Intrie, managing director or the Edmonton Journal in an address to the Commercial Club of the University of Alberts.

TAMPERING WITH **ELEVATOR SCALES** IS CHARGE MADE

Fort William, Ont.—Letters-tharing, important beavins on altoged filling of scale beams in country elevators of scale beams in country elevators of scale beams and affects were submitted by Chief Counsel Woods at a scassion of the Royal Grain Inquiry Commission. These related to evidence, brought out at Moose Taw, chiefly from discharged grain bayers of some companies. The complision counsel had written at itic-close of that meeting to the Ottawa Department of Weights and Measures of that the Chief of the C

Into mentioned as came under their experience.

At Moose Jaw one discharged buyer and be hard filed a beam so as to cheet the patrons having grain weighted there, on the orders of his superinstendent, which was denied, by that officer, though he admitted having found the filed beam as described and having corrected it. These tamperings, in order to give the farmer light weights, the disclosures in the communication from the department showed, were found in a number of cases.

A letter of October 4 from the de-A letter of October 4 from the de-partment said it was thought the subject should be carefully five-sligat-ed and the commission make some recommendations that would give greater security to the Tarmers. The chile fleter submitted was from the government superintendent of weights and measure, at Sakaktoon, December 9, During eight years in the locality covered by him in Saskatchewan and Albertan be had instances of four scale beams having been filed. One would give the slevator some 40 pounds the

beams having been filed. One would give the elevator isome 40 pounds the best of, weights if used. The agent dended all knowledge of the filing and had corrected it. 'The previous buyer at that point had been discharged. The, second case showed the butt of the beam worn so that, if used, it would give the farmer twenty pounds the worst of it. The agent there was new that year.

Would Stop Artisan Influx Winnipeg.—In an effort to counter-act the wholesale influx into Canada act the wholesale influx into Canada of artisans and skilled tradesimen from the British Isles a memorial will be forwarded to the minister of labor in the MacDonald Government, at the instance of the Winnipeg Trades and Labor Council, setting forth the actual condition of the labor market in the west, particularly Manitoba.
